CAREER OBJECTIVE

AI Engineer with hands-on experience building LLM-powered applications, AI automation workflows, Retrieval-Augmented Generation (RAG) systems, vector databases, and intelligent business solutions using Python, FastAPI, LangChain, ChromaDB, and Groq LLMs. Passionate about building AI products from idea to deployment and solving business problems through intelligent automation.

EDUCATION

Master of Computer Applications — 2025 — **89%**

Bachelor's in Computer Science — 2023 — **75%**

Intermediate (Maths) — 2020 — **92%**

SSC — 2018 — **88%**

SKILLS

- **Programming & Data Handling:** Python (Pandas, NumPy), SQL (PostgreSQL)
- **Machine Learning & Statistics:** Regression, Classification, Clustering, Scikit-Learn, EDA
- **Generative AI & LLMs:** Embeddings, Vector Stores, Similarity Search, Prompt Engineering, RAG, LangChain, Vector Databases (ChromaDB), Semantic Search
- **Data Engineering:** Data preprocessing, Feature engineering, Data pipelines, Data cleaning
- **AI Frameworks & APIs:** FastAPI, Groq API, SentenceTransformers, Hugging Face Transformers, REST APIs
- **AI, LLMs, Tools:** LangChain, Kiro, Claude, Trae, Antigravity, Fork, Claude Code
- **Methodology:** BMAD Method (Business Modeling & AI Development), Prompt Engineering & AI-assisted development

EXPERIENCE

AI/ML Engineer

Dhanush Info Tech Solutions — Hyderabad, India — Current

Smart HR — Automated Employee Onboarding System (In Progress)

HR system covering onboarding, attendance, and recruitment workflows.

- **Automated Employee Onboarding System (Completed)** – Built and deployed an end-to-end AI-driven onboarding workflow, streamlining the employee onboarding process and reducing manual efforts.
- **Face Recognition-based Check-in/Check-out System** – Developed a facial recognition module for automated employee attendance tracking, enabling secure, contactless check-in and check-out.
- **ATS (Applicant Tracking System) for Resume Shortlisting** – Built an AI-powered resume screening module that automates candidate shortlisting based on job-fit matching, reducing manual recruiter effort in the hiring pipeline.

Saubhagya

Large-scale digital platform managing dung collection, manufacturing, B2B sales, and admin operations, built using the BMAD methodology with AI/LLM integration.

- Contributed across the Gaushala (cattle/batch tracking), Manufacturing, Sales (B2B e-commerce), and Admin modules, covering data validation, production tracking, and role-based access management.

AI/ML Intern (3 months)

Dhanush Info Tech Solutions — Hyderabad, India — Jul – Sep 2025

PROJECTS

VidMatch — YouTube Content-Based Video Recommendation Chatbot

FastAPI · ChromaDB · RAG · Groq LLaMA 3.1 · SentenceTransformers

- Built a full-stack RAG application that recommends YouTube videos by semantically searching spoken transcripts using vector embeddings (all-MiniLM-L6-v2) and ChromaDB, with an 11-step pipeline covering query expansion, chunking, hybrid ranking, and LLM-generated explanations via Groq LLaMA 3.1.

CERTIFICATIONS

- **Generative AI for Data Analysis and Data Science**– LinkedIn
- **Web Development Workshop**– Microsoft Learn
- **Career Skills in Software Development** – LinkedIn Learning
- **SQL and Front-End Development** – Great Learning
